- Teach violin 1 on 1 or 1 on 3, from beginner to intermediate.

Education

AUGUST 2022 - PRESENT, GRADUATING MAY 2026

Tampere University of Applied Science – Bachelor of Software Engineering

- Focus on server deployment and Linux systems administration, enhancing ability to manage server environments, and implement security best practices
- Acquire a solid foundation in programming fundamentals, including C, object-oriented programming principles, and web development with JavaScript and its frameworks.

Projects

<https://integrify-library.netlify.app/>

Created a full-stack project with an elegant UI(designed and built my me) with react/redux & sass and a robust backend with .NET, allowing users to loan books and librarians to manage books and authors. Built robust unit and integration testing with 50+ cases. Hosted with an azure web app service with CI/CD, dockerization, and used PostgreSQL for the database(Also hosted on Azure).

<https://github.com/ZealinBee/Kanban-API>

Built a Kanban API with .NET, inspired by the SCRUM Kanban board for project management. Includes detailed documentation for public use cases.

<https://github.com/ZealinBee/aged-like-milk-backend>

Built a blog content management system in Spring Boot in 2 weeks without any prior knowledge in Spring Boot, with complex auth system managed with Spring Security.

[More projects in my Github](#)
