

Zhiyuan Liu - Full-Stack Developer

+358 451718399
zhiyuan.liu023@gmail.com
Tampere, Finland

Specialized in full-stack development with a strong proficiency in .NET, PostgreSQL, Azure, and React/Redux. Trained and experienced through Integrify, focusing on building full-stack applications, deploying, and implementing CI/CD pipelines in Azure and various other deployment platforms.

Experience

JAN 2024 - JUNE 2023

Full-Stack Supporting Instructor at Integrify Oy

- Support students by providing detailed feedback on hundreds of pull requests. Grade their work based on strict criteria, focusing on full-stack projects utilizing .NET and React.
- Host bi-weekly live Q&A sessions, each lasting 2.5 hours, to answer students' coding problems and assist with deployment challenges.
- Interviewed more than 20 applicants and worked with the talent recruiter to choose the right candidates.

AUG 2022 - JUNE 2023

Student Ambassador at TAMK

- Presented for my university at Finnish high schools on campus.
- Joined school events where I led campus tours for visitors.
- Communicated with dozens of students who are eager to apply to the university.
- Wrote blog posts and instagram posts for the school.

JAN 2021 - JULY 2022

Violin Teacher

- Taught violin at different levels, from beginner to intermediate.
- Ensuring good techniques with the students, ranging from teaching 1 to 1 to 1 to 3.

Education

AUGUST 2022 - PRESENT

Tampere University of Applied Science - *Bachelor of Software Engineering*

- Concentrated on server deployment and Linux systems administration through targeted coursework, enhancing my ability to manage server environments, and implement security best practices
- Acquired a solid foundation in programming fundamentals, including proficiency in lower-level languages such as C, object-oriented programming principles, and web development with JavaScript.

APR 2023 - OCTOBER 2023

Integrify Full-Stack Trainee

A full-stack training program where developed full stack web applications individually and with team
Tech Stack:

Frontend: React/Redux, TypeScript, CSS/SASS, MUI

Backend: .NET, PostgreSQL

Deployment: Docker/CI/CD with Github Actions on Azure App Services/VM

Projects

<https://integrify-library.netlify.app/>

Created a full-stack project with an elegant UI(designed and built my me) with react/redux & sass and a robust backend with .NET, allowing users to loan books and librarians to manage books and authors. Built robust unit and integration testing with 50+ cases. Hosted with an azure web app service with CI/CD and used PostgreSQL for the database(Also hosted on Azure).

<https://github.com/ZealinBee/Kanban-API>

Built a Kanban API with .NET, inspired by the SCRUM Kanban board for project management. Includes detailed documentation for public use cases.

<https://github.com/ZealinBee/aged-like-milk-backend>

Built a blog content management system in Spring Boot in 3 weeks without any prior knowledge in Spring Boot, with complex auth system managed with Spring Security.

[More projects in my Github](#)

Technical Skills

- | | | | |
|----------------------------|------------------------------------|---------------|--------------|
| ● HTML/CSS | ● Javascript/Typescript | ● React/Redux | ● PostgreSQL |
| ● Git/Github Actions/CI/CD | ● Java/Spring Boot/Spring Security | ● C#/.NET | ● Azure |

Languages

- Chinese (Native)
- English (Native Bi-Lingual)
- Finnish (A2 YKI certified)
